7   Meta Theory

Static Meta Theory

Theorem 1 (Confluence). *If $m \rightsquigarrow^* m_1$ and $m \rightsquigarrow^* m_2$, then there exists n such that $m_1 \rightsquigarrow^* n$ and $m_2 \rightsquigarrow^* n$.*

Theorem 2 (Conversion). *Conversion $\simeq$ is an equivalence relation.*

Theorem 3 (Static Validity). *For any static typing $\Gamma \vdash m : A$, there exists sort s such that $\Gamma \vdash A : s$ is derivable.*

Theorem 4 (Sort Uniqueness). *If there are static typings $\Gamma \vdash A : s$ and $\Gamma \vdash A : t$, then $s = t$.*

Theorem 5 (Static Subject Reduction). *If there is static typing $\Gamma \vdash m : A$ and static reduction $m \rightsquigarrow n$, then $\Gamma \vdash n : A$ is derivable.*

Theorem 6 (Static Normalization). *For any m with static typing $\Gamma \vdash m : A$, it is strongly normalizing.*

Dynamic Meta Theory

Theorem 7 (Dynamic Reflection). *For any dynamic typing $\Gamma; \Delta \vdash m : A$, static typing $\Gamma \vdash m : A$ is derivable.*

Theorem 8 (Value Stability). *If there is value v with dynamic typing $\Gamma; \Delta \vdash v : A$ and $\Gamma \vdash A : s$, then $\Delta \triangleright s$.*

Theorem 9 (Dynamic Subject Reduction). *If there is dynamic typing $\Gamma; \Delta \vdash m : A$ and dynamic reduction $m \rightsquigarrow\!\!\!\twoheadrightarrow n$, then $\Gamma; \Delta \vdash n : A$ is derivable.*

Theorem 10 (Dynamic Progress). *If there is dynamic typing $\epsilon; \epsilon \vdash m : A$, then m is a value or there exists n such that $m \rightsquigarrow\!\!\!\twoheadrightarrow n$.*

Erasure-Dynamic Meta Theory

Theorem 11 (Erasure Existence). *For any dynamic typing $\Gamma; \Delta \vdash m : A$, there exists m' such that erasure relation $\Gamma; \Delta \vdash m \sim m' : A$ is derivable.*

Theorem 12 (Erasure Subject Reduction). *For any erasure relation $\Gamma; \Delta \vdash m \sim m' : A$ and dynamic reduction $m' \rightsquigarrow\!\!\!\twoheadrightarrow n'$, there exists n such that the following diagram commutes.*

$$
\begin{array}{ccccc}
\Gamma; \Delta & \vdash & m & \sim & m' & : & A \\
& & \big\Updownarrow & & \big\Updownarrow & & \\
\Gamma; \Delta & \vdash & n & \sim & n' & : & A
\end{array}
$$

Theorem 13 (Erasure Progress). *For any erasure relation $\epsilon; \epsilon \vdash m \sim m' : A$, then m' is a value or there exists n' such that $m' \rightsquigarrow\!\!\!\twoheadrightarrow n'$.*
